

# AUTOWAGEN MASTER

Staff guide — money & web order reports · how to open · what each is for · sample layouts (illustration only)

**Who this is for:** shop owner and staff on an **owner / admin / manager / staff** login. The **viewer** role may not see some Inventory items (e.g. Accounts payable).

## Contents

- [§1 Accounts payable — who we still owe suppliers](#)
- [§2 Accounts receivable — customers who owe us](#)
- [§3 Customer account statement \(one buyer\)](#)
- [§4 Web shop orders \(guest online sales\)](#)
- [§5 Summary table — navigate at a glance](#)

## §1 — Accounts payable (who we still owe)

### What it is for

You bought parts or wreck stock via **Supplier purchases** and entered a **Bill (ZAR)**. This report lists every purchase row where **bill – payments > 0**. It answers: “**Who must we pay, how much is left?**” — includes **registered suppliers** and **private sellers** on purchases.

### How to open it (logged in)

1. Ensure Laragon shows **Start All** (Apache + MySQL green).
2. Browser → **login:** `http://localhost/autowagen-master/auth/login.php`
3. Black top menu → click **Inventory** → click **Accounts payable (owed)**.

**Shortcut URL:** `.../supplier_ap_report.php`

### What you can do on screen

- **As at (report date)** — pick a date and **Apply** (for your records; balances are “current” open amounts).
- **Total still owed** — red summary card at top.
- Table columns: **Purchase #**, **Owed to** (supplier name or private seller), **Bill**, **Paid so far**, **Balance**, **Status** (Unpaid / Part paid), **Due**, **Open** → goes to that purchase to add payments.
- **Summary by who we owe** — small cards grouped by party.
- Link **Supplier purchases** → list of all purchase batches.

### If the page warns about SQL

Run `sql/04d_supplier_accounts_payable.sql` in phpMyAdmin on database `autowagen_master` (after 4c). Until then the report may show a yellow warning.

Inventory ▾ ... Accounts payable (owed)

#### Accounts payable — who we still owe

ZAR only · As at 2026-05-15 | [Apply] | Supplier purchases

Total still owed (all rows below):

R 12,450.00

| Purchase     | Owed to               | Bill        | Paid       | Balance    | Status    | Due        |
|--------------|-----------------------|-------------|------------|------------|-----------|------------|
| #2 · REF-ABC | HASSAN NIZAMIE        | R 10,000.00 | R 2,000.00 | R 8,000.00 | Part paid | 2026-05-30 |
| #5 · —       | ♦ Private: J. Sithole | R 5,200.00  | R 750.00   | R 4,450.00 | Part paid | —          |

#### Summary by who we owe

HASSAN NIZAMIE

R 8,000.00

Private: J. Sithole

R 4,450.00

## §2 — Accounts receivable (customers who owe us)

### What it is for

After **POS** you **Finalize** invoices. If the customer did not pay in full, a **balance** remains. This report answers: “**Which customers owe us money, which invoices are overdue by due date?**”

**This is NOT supplier PAYABLE.** If you are looking at purchase batches (HASSAN NIZAMIE, Purchase #2), use §1 Accounts payable instead.

### How to open it

1. Black menu → **POS** → **Accounts receivable (owed)**.

**Shortcut URL:** .../customer\_ar\_report.php

### What you can do on screen

- **As at** — date used to mark **overdue** (invoice **due date** strictly *before* this date, with unpaid balance).
- Ticks: **Overdue only** narrows lists. If your database ran **06a: Account customers only** restricts to flagged account buyers.
- **Apply** refreshes filters.
- **Print / PDF** button — uses browser print (hide nav).
- **By customer** — one row per customer: balance, overdue portion, links **Statement** and **Customer**.
- **By invoice** — open balances per invoice with badges (**Overdue Nd**, **Open**, **No due date**).

### If the page warns about SQL

- **Run** `sql/05_pos.sql` for invoices/payments tables.
- **Account customers only** tick needs `sql/06a_customer_account.sql` — otherwise AR still works without that filter.

### AUTOWAGEN — Accounts receivable

As at **2026-05-15** (Johannesburg) · [As at ▾] [✓ Overdue only] [Apply] [Print/PDF]

Total owed

**R 7,892.34**

Of which overdue

**R 3,100.00**

### BY CUSTOMER

| Customer      | Account | Phone        | Balance    | Overdue    |
|---------------|---------|--------------|------------|------------|
| ABC Panels CC | Account | 082 555 0199 | R 5,792.34 | R 3,100.00 |
| Walk-in buyer | —       | —            | R 2,100.00 | —          |

### BY INVOICE (OPEN BALANCE)

| Invoice        | Customer      | Inv date   | Due date   | Status      | Balance    |
|----------------|---------------|------------|------------|-------------|------------|
| INV-2026-00412 | ABC Panels CC | 2026-03-02 | 2026-04-01 | Overdue 44d | R 3,100.00 |
| INV-2026-00455 | Walk-in buyer | 2026-05-10 | —          | No due date | R 2,100.00 |

## §3 — Customer account statement

### What it is for

Gives **one named customer** a printable breakdown: outstanding **final** invoices (totals, paid, balance), optional **recent payments**, and shortcuts to **WhatsApp** / **PC email** (summary text — you attach the PDF yourself after **Print / PDF**).

### How to open it

#### Path A — from Customers

1. Menu **Master data** → **Customers**.
2. Find the person in the table → click the **Statement** link on that row.

#### Path B — from AR

1. Open §2 Accounts receivable.
2. In **By customer**, click **Statement** beside that customer.

**URL pattern:** .../customer\_statement.php?id=CUSTOMER\_ID (browser shows number after opening once).

### What you can do on screen

- **Statement as at** + **Include paid-in-full invoices** tick → **Apply**.
- **Print / PDF** → formal PDF for the client attachment.
- **WhatsApp / Email** — prefilled summary (not full branded PDF).

- **Edit customer** / link back to **AR report**.

| 2026-04-05 | INV-2026-00412 | R 2,500.00 | EFT    | INV412    |

## §4 — Web shop orders

### What it is for

Lists **guest** orders from the public **/shop/** checkout. Stock was reduced when the order was placed. Use it to **call the buyer**, coordinate payment/collection, and **cancel** an order if needed (restores stock).

This is **not** a full “sales analytics” report (no monthly charts) — it is an **operational order list**.

### How to open it

1. Menu **Inventory** → **Web shop orders**.

**Shortcut URL:** .../shop\_orders\_admin.php

### What you can do on screen

- List of **WEB-YYYY-NNNNN** orders with status (e.g. confirmed / cancelled).
- **Open** a row → buyer name, phone, lines (SKU, qty, snapshot prices), totals.
- **Cancel order & restore stock** — only when business rules allow; confirms in browser.
- Link to open the **public shop** in a new tab.

### If the page warns about SQL

Run `sql/06b_web_shop.sql` in phpMyAdmin.
