

Use this order: finish each phase (with its test) before the next. Full backlog detail stays in `docs/BACKLOG_POST_STAGE7.md`.

PHASE A — LIVE / OPS

1. PC: save work · `git push` · (`docs/git_laragon_terminal_start_to_finish_print.html`).
2. Upload or pull **program files** to hosting (FTP / cPanel / server git). If menus are old: at least `includes/header.php`, `main_dashboard.php`, plus any files you changed.
3. Server: `config/secrets.live.php` = live DB (copy from `secrets.live.php.example` — never commit real passwords).
4. Host **phpMyAdmin**: run missing `sql/*.sql` in order for **that** database (see `CLAUDE.md` section 10).
5. Browser: open **live** URL → login → **Reports** → one report loads.

PHASE B — TEST (AFTER LIVE IS UPDATED)

1. Login · Dashboard.
2. POS: **New sale** or **Sales invoices** — open a draft.
3. **Reports**: e.g. AR + Sales summary — no error page.
4. Guest: `/shop/` on the **live** base URL.
5. Optional: **Credit notes** if 07 ran on live DB.
6. Log **PASS** or issue in `CLAUDE.md` section 9.

PHASE C — NEW CODE (BACKLOG — ONE BLOCK AT A TIME)

Only after A + B, unless you deliberately build on Laragon only first.

Typical order	Topic	Detail
1	SMTP / server email	Statements or reminders from the server
2	Supplier AP returns	Credits on the buying side
3	PayFast / Stripe	Web checkout payments
4	Alternate net-due rule	Accountant spec only — explicit go

Build on **localhost** first → then repeat Phase A deploy → Phase D.

PHASE D — TEST (AFTER EACH BACKLOG FEATURE)

1. Test changed screens on Laragon.
2. `git commit` · `git push`.
3. Deploy to live (Phase A file/SQL steps as needed).
4. Smoke-test live again (Phase B + feature-specific checks).
5. Update `CLAUDE.md` section 9 and `docs/CHANGELOG.md` / `CHANGELOG.html`.

PHASE E — POLISH / DOCS

1. Add PNGs per `docs/TRAINING_SCREENSHOTS.md` → `docs/manual_screenshots/`.

2. Print `complete_system_manual.html` → PDF when figures are filled.

3. Optional: `docs/md_backups/YYYY-MM-DD/` snapshot of key `.md` files.

4. Index of all printable guides: `docs/client_training_index.html`.

Pair with: `docs/database_update_backup_guide_print.html` · `docs/session_pause_handoff_print.html` · `HOW_TO_START_NEW_CHAT.md`
